# BOLLARDS

## Key Features

- 5-Inch Diameter Galvanized Bollard Pipe
- Electrocoat and Powder Coat Cast Iron Coating
- Hot Dipped Galvanized and Polyester Pipe Coating
- Set and Anchor Screws
- Slow Stop Rebounding Technology

## Major Benefits

- **Proven Performance:**  
Flexible steel bollard can stop 5000 pounds of force at 5.6 miles per hour without damage from collision accidents.
- **Reliable Safety:**  
Highly visible yellow powder coating ensures perimeter safety awareness at all times for ongoing vehicle traffic.
- **Advanced Durability:**  
Strong surface mount and patented rebounding technology protects concrete foundations and anchors from sheer forces.
